

# Electromagnetic Field 2012

A three-day camping festival for people with an inquisitive mind or an interest in making things: hackers, geeks, scientists, engineers, artists, and crafters.

Electromagnetic Field is an all-volunteer effort by a non-profit organisation. We are members of well-known hackerspaces and other organisations.

**Friday 31st August to  
Monday 3rd September  
2012**

**Pineham Park, Milton  
Keynes, MK15 9LZ, UK**

**+ Coordinates: 52.061 N -0.710 W**

Electromagnetic Field is a three-day camping festival for those who want to learn, make, and break things. Throughout the event you can attend workshops and talks, or just hang around by the bar and meet people.

There will be people talking about everything from genetic modification to electronics, blacksmithing to high-energy physics, crocheting to carpentry, and quadcopters to beer brewing. If you want to talk, there'll be space for you to do so, and plenty of people who will want to listen.

The camp will be littered with interesting things to play with and explore. No matter what your skill level is, there will always be something to do and someone to talk to.

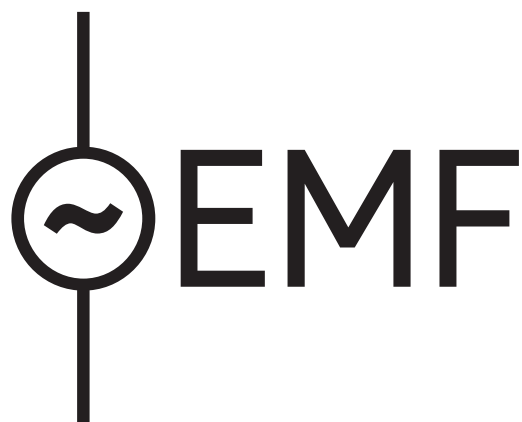

Aside from the organised talks and workshops, attendees are forming villages and planning events of their own. Wander between tents and

you might come across someone teaching safecracking, or accidentally stumble into a late-night jam session using instruments constructed from circuit boards and glowing wire. If you decide to come with friends, maybe you should host something of your own!

A ticket costs £95 (or €120) which gives you a secure place to camp for three days, power and internet to your tent, hot showers, access to all talks and workshops, and one fully programmable wireless camp badge.

Events and activities will run throughout the day and into the evening, everything else will run as long as your collective energy lasts.
